

## **Varaha Systems Joins Cisco Developer Program, Completes Interoperability Testing**

*Varaha's uMobility Solution Ready to be Marketed and Sold Worldwide by Cisco Re-Sellers*

DALLAS, TX, November 11, 2008 – Varaha Systems, Inc., a leading provider of enterprise Fixed-Mobile Convergence (FMC) solutions, announced today that it has joined the Cisco Technology Developer Program as part of the program's IP Communications / Application Servers solution category. In addition, Varaha's uMobility solution V3.2 has successfully completed interoperability testing with Cisco Unified Communications Manager (CUCM) V6.1.

The Cisco Technology Developer Program (<http://www.cisco.com/go/ctdp>) unites Cisco with third-party developers of hardware and software to deliver tested interoperable solutions to joint customers. Members of the program share Cisco's strong commitment to customer service and satisfaction and are required to undergo interoperability testing based on criteria set forth by Cisco. With Cisco Technology Developer Program member offerings such as Varaha's uMobility, customers can more quickly deploy a broad range of Cisco Compatible business applications that can enhance the capabilities, performance, and management of their Cisco network.

\*The interoperability testing is designed to simulate typical customer configurations, and does not replace the need for on-site testing in conjunction with actual implementation.

### **About Varaha Systems**

Varaha Systems is a leading provider of enterprise fixed-mobile convergence solutions for small and medium-sized businesses. Varaha's patented and comprehensive uMobility solution ensures superior voice quality through its Service Quality Aware (SQA) software architecture, seamless network hand-offs and enterprise-grade security along with a rich set of mobile capabilities.
